

The new FLEXY-KING, the brush with swinging bristle-head !

Our new and innovative Flexy King was tested very hard from various well known groomers and as result they named it as an "outstanding brush".

Friendly for pets - Brush without pain as well as much lower irritations of pets skin!

Our new **Flexy King** is most suitable for de-matting and unravel. There is also no problem to work with all different kinds of coat. The small shape of **Flexy King** was made especially for the problematical zones of a pet (like legs....)

The **Flexy-King** is most effective in removing dead hair, because of the swinging bristle-head as well as of using very fine stainless steel bristles. Otherwise the **Flexy King** is easy on for the pets-skin. The bristle-field opens the bristles by using in opposite to conventional brushes and the bristles will close immediately when the **Flexy King** will taken away from the coat. By doing this the bristles will hold the dead hair and remove it from the coat. This kind of function is against to conventional brushes and responsible for the outstanding effectiveness of the **Flexy King**.

Friendly for groomer

Our new **Flexy King** has an ergonomically and absolutely balanced plastic handle with soft rubber rings for stressless working. The positioning of the bristle-head and direction of the bristles in straight extension of the arm of the groomer is excellent for an easy job as possible. The bent finger-rest has an double function. First as a comfortable rest for your thumb or forefinger (depending of kind of using) and second it stops the inflexion of the stainless steel made bristle-holder. By making pressure the bristle-head is springy till moving to the detent.

Friendly for your time

The new **Flexy-King** will give you an enormous advantage in compete to the conventional brushing, because he is doing two steps of grooming into one. The **Flexy King** is easy on to your pet, because he is hard to mats and soft to the skin. The fussy job of brushing could be done much easier and shorter than ever before.

By testing we have learned the highly effectiveness of this tool as well as we have the impression that the acceptance for brushing has grown, especially in some difficult to brush pets like CATS. The manufacturing of the **Flexy King** follows our philosophy to use only the finest materials and the experiences in handcrafting of our workmanship.

So the new **Flexy King** is fitting exactly in the line of our STRIPPERS and COAT KINGS.

Finally enjoy your new Flexy King
